

Meryeme Mesbahi

Front-End Developer

Email: meryemmesbahi7@gmail.com | Phone: +212 6 02 00 55 67 | LinkedIn: [Meryeme Mesbahi](#) | Github: [mme-sbahi](#)

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building modern, responsive web applications using **React**, **Next.js**, and **TypeScript**. Passionate about creating clean, performant user interfaces with a focus on UX best practices and scalable architecture. Proven ability to collaborate in agile, cross-functional teams, from startups to hackathons, delivering user-centric solutions.

EDUCATION

UM6P-1337 Coding School — Solution Architect Track
2022 – Present | Khouribga, Morocco

- Project-based curriculum emphasizing software engineering, algorithms, OOP, and system design
- Hands-on experience with C, C++, JavaScript, and shell scripting

Baccalaureate Diploma in Physics
2021 | Casablanca, Morocco

- Focused on analytical thinking and scientific problem-solving

EXPERIENCE

Frontend Intern — Chatlilo (Startup)
5/2025 – 1/2026

- Developing responsive and reusable user interfaces using React and Next.js
- Collaborating with designers and backend developers to deliver product features
- Contributing to UI/UX improvements in an iterative startup environment

Frontend Developer — BCG Hackathon
5/17/2025 – 5/27/2025 - 10 days

- Built the responsive frontend of a bias-aware job–resume matching platform using Next.js
- Integrated generative AI features to improve candidate shortlisting workflows
- Contributed to UX improvements aimed at reducing recruiter workload

PROJECTS

Ping Pong Platform

- Web platform featuring authentication, user management, and responsive UI
- Led frontend implementation including Two-Factor Authentication (2FA)
- Technologies: React, Next.js, TypeScript, Tailwind CSS, shadcn/ui

Inception

- Created a containerized multi-service infrastructure using Docker and Docker Compose
- Gained practical experience in networking, security configurations, and service orchestration
- Technologies: Docker, Docker Compose, Linux, Shell Scripting

Internet Relay Chat (IRC)

- Built a custom IRC server in C++, managing client connections, message routing, and channel communications
- Strengthened understanding of low-level networking and real-time communication systems
- Technologies: C++, Socket Programming, Network Protocols

SKILLS

- **Programming Languages:** JavaScript, TypeScript, C, C++
- **Frontend Technologies:** React, Next.js, HTML5, CSS3, Tailwind CSS
- **Tools & Methods:** Git, GitHub, Docker, Linux, Responsive Design, UI/UX Best Practices
- **Languages:** Arabic(Native), French(Fluent), English(Fluent)
